

Pfizer Recalls Lo/Ovral Birth Control Pills

Perhaps you've heard about the recall on Lo/Ovral birth control pills.

You can feel sure that the pills are safe and effective. The problem is a packaging error that left some packs with either too many white pills or too many of the pink pills.

The white pills contain no hormones so if there are more than 7 of these pills you may be at risk of getting pregnant.

Only some packages with certain lot numbers are affected.

If you have packages of Lo/Ovral you got from Health Quarters, come by, or give us a call so we can check the lot numbers. We will replace any affected packages.

We want you to be safe. If you are unsure if this recall applies to you, use condoms or abstain until we can answer your questions.

Here's a link to the recall notice: <http://www.fda.gov/safety/recalls/ucm289770.htm>
